

Bioregions

Forest bioeconomy in action

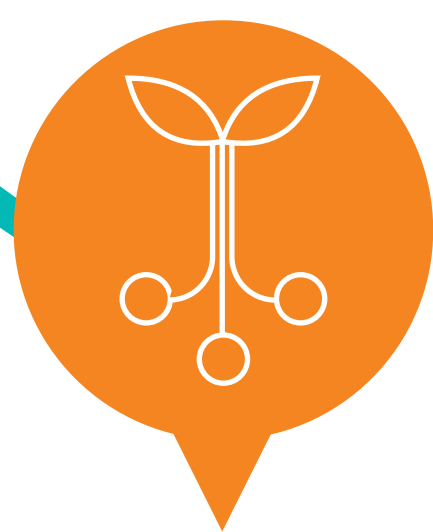

The Bioregions Facility is a knowledge-led platform dedicated to achieving inter-regional co-learning and cooperation – supporting the development of a sustainable regional bioeconomy in Europe.

LINES OF ACTION

Policy learning

Support networking and policy learning to identify and replicate successful actions through webinars, bioeconomy strategies, technical reports and field visits.

Innovation

Catalyse bioeconomy business and innovation to accelerate progress and knowledge uptake through open challenges, forestry matchmaking, strategic partnerships, and innovation days.

Awareness and engagement

Strengthen stakeholder engagement and improve understanding and attitudes towards the bioeconomy through capacity building, targeted surveys, and co-creation approaches in bioeconomy.

BIOREGIONS MEMBERS

Regional stakeholders get access to the Facility's activities, from industrial clusters and business development support, to public agencies, research centres, academia and civil society.

Key benefits include:

- ➔ Share and exchange knowledge and best practices among members to overcome barriers and flag concrete opportunities.
- ➔ Pool resources to multiply the impact of your bioeconomy initiatives, bringing regional solutions to European audiences and vice versa.
- ➔ Strengthen your bioeconomy innovation capacity through open challenges and partnership brokerage to interconnect and internationalise your bioeconomy ecosystem.
- ➔ Increase the visibility of your region in the international bioeconomy landscape and contribute to the centrality of regions in forest bioeconomy EU policies.

Bioregions members are Basque Country, Catalonia and North Rhine-Westphalia. Observers are Austrian regions, Castile and León, and the Committee of the Regions - NAT Commission (COR).

For further information on the Bioregions Facility, on how to become a member or to request observer status, please contact us at bioregions@efi.int
